NEW PRODUCTS

Sonifex showed its new Redbox models with Dolby E decode and

encode processing at NAB.

The new video Redboxes use the latest technology components to offer embedding and de-embedding for analogue and digital audio signals into and out of all 3G, HD, and SD-SDI video signals respectively. The RB-VHDDD8 is an SDI audio de-embedder and re-embedder with Dolby E and Dolby Digital decoding capabilities. The RB-VHEDD8 is an SDI audio de-embedder and re-embedder with Dolby E encoding capabilities.
